Seeking:

New opportunities and interesting things. A job where I can leverage past computer experience would be ideal. I'm very detail oriented and logically minded, so any role where that would be beneficial would be wonderful. I travel extensively and work on my own truck, so I'm mechanically inclined as well. I've been working temporary jobs for a while and am ready to find a permanent role where I can settle down.

Express Personnel (9/2025 - 12/2025)

- Assigned to Naysonian Solutions
